Message from the Program Co-chairs

It is with great pleasure that we welcome you to this eighth edition of Vision Interface. Computer vision covers a broad field that keeps expandinging. Research in this domain requires more and more multidisciplinary designs and this year again the variety and the quality of the papers reflect the marvelous complexity of the processes involved.

We want to offer our special thanks to the guest speakers who kindly accepted our offer, to the numerous reseachers who have chosen this conference for presenting the results of their most recent works, and to all the participants for their support. This conference would never have happened without the important and benevolent work of the local organizers and of the program committee members. We also want to thank the organizers of the previous conferences for their help in passing on valuable information.

Jean-Jules Brault, École Polytechnique de Montréal
Minas E. Spetsakis, York University

Message from the General Co-chairs

This year we are happy to host the GI-VI conference at York University in Toronto. We would like to thank all people involved in organising the conference and invite the attendees to enjoy with us the special events and the city of Toronto.

John Amanatides, Michael Jenkin
York University

Un message des co-présidents du comité de programme

C'est avec beaucoup de plaisir que nous vous accueillons à cette huitième édition de Vision Interface. La vision par ordinateur est un domaine très riche et en constante évolution. De plus en plus, les recherches dans ce domaine nécessitent des approches multidisciplinaires, et encore cette année, la variété et la qualité des contributions reflètent la merveilleuse complexité des processus impliqués.

Nous tenons ici à remercier les conférenciers invités d'avoir accepté notre tribune, les nombreux chercheurs d'avoir choisi cette conférence pour venir présenter les résultats de leur plus récents travaux, et de tous les participants pour leur soutient. La tenue de cette conférence n'aurait pas été possible sans le travail important, et bénévole, des organisateurs locaux et des membres du comité de programme. Nous tenons également à remercier les organisateurs des conferences précédentes pour toutes les informations qu'ils nous ont si diligemment léguées.

Jean-Jules Brault, École Polytechnique de Montréal
Minas E. Spetsakis, Université York

Un message des co-présidents généraux

Nous sommes heureux d'acceuillir à l'Université York la conférence annuelle GI-VI. Nous tenons à remercier toutes les personnes qui furent impliquées dans son organisation, et invitons les participants à profiter avec nous des événements speciaux prévus au programme et aussi des nombreux attraits qúoffre la ville de Toronto.

John Amanatides, Michael Jenkin, Université York

# Table of Contents/Table des matiéres

**Modeling**

*Color and Shape Based Tracking* Victor Wu, Evangellos Milios ..... 1

*Optimal Common Subgraph Isomorphism for Model Synthesis* Bruce McArthur, Andrew Wong ..... 7

*Estimating the pose of 2D objects using potential functions and quadtrees* Regis Houde, Jacques Tremblay, Denis Laurendeau, Michel Pelletier ..... 15

*Surface profile description: invariant stable extraction of straight line segments* Patrick Hebert, Denis Laurendeau, Denis Poussart ..... 21

**Invited talk**

*Behavioural Visual Motion Analysis* Yiannis Aloimonos ..... 27

**Image Processing**

*Training Neighborhood Markov Random Fields by Sampling - How Much Data is Required?* Davin Milun, David Sher ..... 29

*A Pyramidal Architecture Based on a Quadtree Storage Scheme* Alberto Aguado, Maria Eugenia Montiel, Jaime Alarcon, Maria Garza-Jinich ..... 34

*Sampling Techniques in the Wiener Image Restoration* Radu Campeanu ..... 42

*Variable Resolution Boundary Detection* Anup Basu, Manoj Jain, Xiabo Li ..... 48

*Tree-structured Encoder for Vector Quantization of Image Data* Mohamed Kamel, L. Guan ..... 54

*On Improving the Performance of JPEG Image Compression at Low Encoding Bitrates* Mohamed Kamel, Quentin Tang ..... 58

**Modeling and Representation**

*LSP: A View Insensitive 3D Representation Method* Xiaobu Yuan ..... 64

*Finite Element Techniques for Fitting a Deformable Model to 3D Data* Tim McInerney, Demetri Terzopoulos ..... 70

*Extraction and Approximation of Range Image Data using a Rational Bezier Surface* Iwao Sekita, Pierre Boulanger, Guy Godin ..... 77

**Robotics**

*Building a multi-scale surface model of the workspace of a robot manipulator* Yue Liu, Denis Laurendeau ..... 84

*Organizational Characteristics for Multi-Agent Robotic Systems* Greg Dudek, Michael Jenkin, Evangellos Milios, David Wilkes ..... 91

*Model-based map construction for robot localization* Greogory Dudek, Paul MacKenzie..

97

**Invited Talk**

*ARK: Autonomous Robot for a Known Environment* Bruce Nickerson ..... 103

**Motion and Stereo**

*Stereo Matching Based on Fixed Point Theorem* Pierre Lacourse, Przemyslaw Pochec..

107

*Fusion of registered 2D intensity and 3D range data: Application to the differential light absorption technique* Jean-Francois Methot, Denis Poussart ..... 110

*Toward Real-Time Optical Flow* David J. Fleet, Keith Langley ..... 116

*Hybrid Feature-Flow-Based 3-D Trajectory Estimation* Steven D. Blostein, Robert M. Chann ..... 125

**Pattern Recognition**

*Extraction of Character-Graphics Images from Document Images with Background Data* Mohamed Kamel, Aiguo Zhao ..... 131

*A neural network approach to handwritten curve partitioning* Marc Lalonde, Jean-Jules Brault ..... 136

*Unsupervised neural net classifier for semantic graphs* Denis Boulanger, Denis Poussart..

143

**Invited talk**

*Pattern Recognition and Expert Systems* Ching Y. Suen, Stephen Malowany, Sam Adel ..... 149

**Pattern Recognition**

*Experiments in Detecting Facial Features* Gloria Chow, Xiaobo Li ..... 157

*Handprinted Kanji Character Recognition by the Background Feature Matching Method Using Non-linear Normalization* Atsishi Yoshida, Yasuo Hongo ..... 165

*On A Combined Strategy to Pattern Recognition* Hazem Raafat, Qinghan Xiao ..... 171

*Mass Vector Controlled View Estimation for Automatic 3D Object Modeling* Xiaobu Yuan ..... 177

Author Index/Répertoire des auteurs ..... 183
