Message from the Program Co-chairs

Many people contributed to make this a successful Vision Interface conference. The program committee, the contributing authors from several countries, the invited speakers, and the local organizers have done an excellent job.

All of the papers appearing in these proceedings have gone through a rigorous review process by the program committee members. Each paper was assigned to three reviewers. This year again, the program committee meetings were held electronically via e-mail. It worked very well and helped to keep the cost of the review process to a minimum.

We hope that this year's VI'96 Conference will again be of interest to the Computer Vision community as it has always been in the past. We also hope that you will enjoy your stay in Toronto.

Welcome to Vision Interface'96.

Fathallah Nouboud
Université du Québec à Trois-Rivières

Michael Jenkin
York University

Message des co-présidents

Plusieurs personnes ont contribué à assurer le succès de cette édition du congrès Vision Interface. Le comité de programme, les auteurs participants de différents pays, les conférenciers invités et les organisateurs locaux ont fourni un effort digne de mention.

Tous les articles qui apparaissent dans ce compte rendu ont subi une Évaluation rigoureuse de la part des membres du comité de programme. Chaque article a été jugé par trois examinateurs. Cette année encore, les discussions du comité de programme se sont tenues avec succès par courrier électronique, réduisant ainsi les coûts du processus de révision.

Nous espérons que la conférence VI'96 de cette année saura à nouveau intéresser la communauté scientifique en vision artificielle. Nous espérons aussi que les participants pourront profiter des attraits de la ville de Toronto.

Bienvenue Vision interface'96.

Table of Contents/Table des matières

Invited Paper

- Document Analysis 1
Jürgen Schürmann, Daimler-Benz Research Ulm, Germany

3-D recognition

- Enhanced 3D Representation using multiple models 17
N. Ayoung-Chee, G. Dudek and F. Ferrie, McGill University
- Monocular system for 3-D recognition 25
A. K. C. Wong, L. Rong and X. Liang, University of Waterloo
- Fast 3D object modeling and recognition in range images 33
R. Fayek and A. Wong, University of Waterloo

Contour Detection

- Le Perceptron multi-couches pour la detection des aretes d'une image 41
M. Mkaouar et R. Lepage, Ecole de Technologie Superieure

Applications I

- Multi-pass feedback control for object recognition 49
M. Mirmehdi, Palmer, Kittler and Dabis, University of Surrey
- A measure of dependency in feedforward networks 57
D. Chiu and M. Leung, University of Guelph
- Deformed shape matching using dynamic programming 64
J. Baid and E. Milios, York University

Applications II

- Geomodeling: Georeferencing Real World Objects 71
Y. Li, C. Saldanha, M. Lalonde, CRIM, Montreal
- A Hierarchical Classification of Experimental Liver Carcinogenesis by Texture Analysis Using Laws Convolution Matrices 77
S. Baheerathan, F. Albregtsen, K. Yogesan, H. E. Danielsen, University of Oslo, Norway
- An extended formal module for visual data processing of business forms and bank cheques 84
J. N. Said, M. Cheriet, C.Y. Suen, Concordia University

Feature extraction	
Focussed color intersection for object recognition <i>V. V. Vinod and H. Murase, NTT</i>	93
La transformee de Hough, nouvelle approche <i>A. Diou, Y. Voisin, C. Santo, Universite de Bourgogne, France</i>	101
Image processing I	
Integration of passive and active vision for range calculation in 2D images <i>D. Fayek and A. Wong, University of Waterloo</i>	109
Adaptive singlepass codebook generation based on ART Neural Networks <i>X. Q. Li, Z. W. Zhao, H. D. Cheng, Utah State University</i>	117
A Fuzzy Approach to Digital Mammographic Feature Enhancement <i>H. D. Cheng, Y. M. Lui, R. I. Freimanis</i>	125
Image processing II	
Analyse et performances d'une methode de localisation et dimensionnement d'objets appliquee a la calibration de cameras <i>C. Santo, A. Diou, Y. Voisin, Universite de Bourgogne, France</i>	133
Optimisation Algorithms for Range Image Registration <i>D. Laurendeau, G. Roth, L. Borgeat, Universite Laval Ste-Foy</i>	141
Tabu Search For Disparity Estimation <i>R. Laganiere and A. Mitiche, University of Ottawa</i>	152
Optical flow	
Steerable filters and cepstral analysis for optical flow calculation from a single blurred image <i>I. Rekleitis, McGill University</i>	159
Parallel near real time optical flow <i>C. E. Siegerist, UBC</i>	167
Sensing and motion	
Environmental Exploration <i>G. Dudek, P. Freedman, I. M. Rekleitis, McGill University</i>	175
Active sensing with VIRTUE <i>J. Lang and M. Jenkin, York University</i>	183
A Study of the Role of the Observer in the Hand/eye Coordiantion Problem <i>Jean-Yves Herve, Ecole Polytechnique de Montreal</i>	191
